

08_evolution.py

```
names = ("Pidgey", "Pidgeotto", "Pidgeot")  
stages = [lambda: s for s in names]  
print([stage() for stage in stages])
```

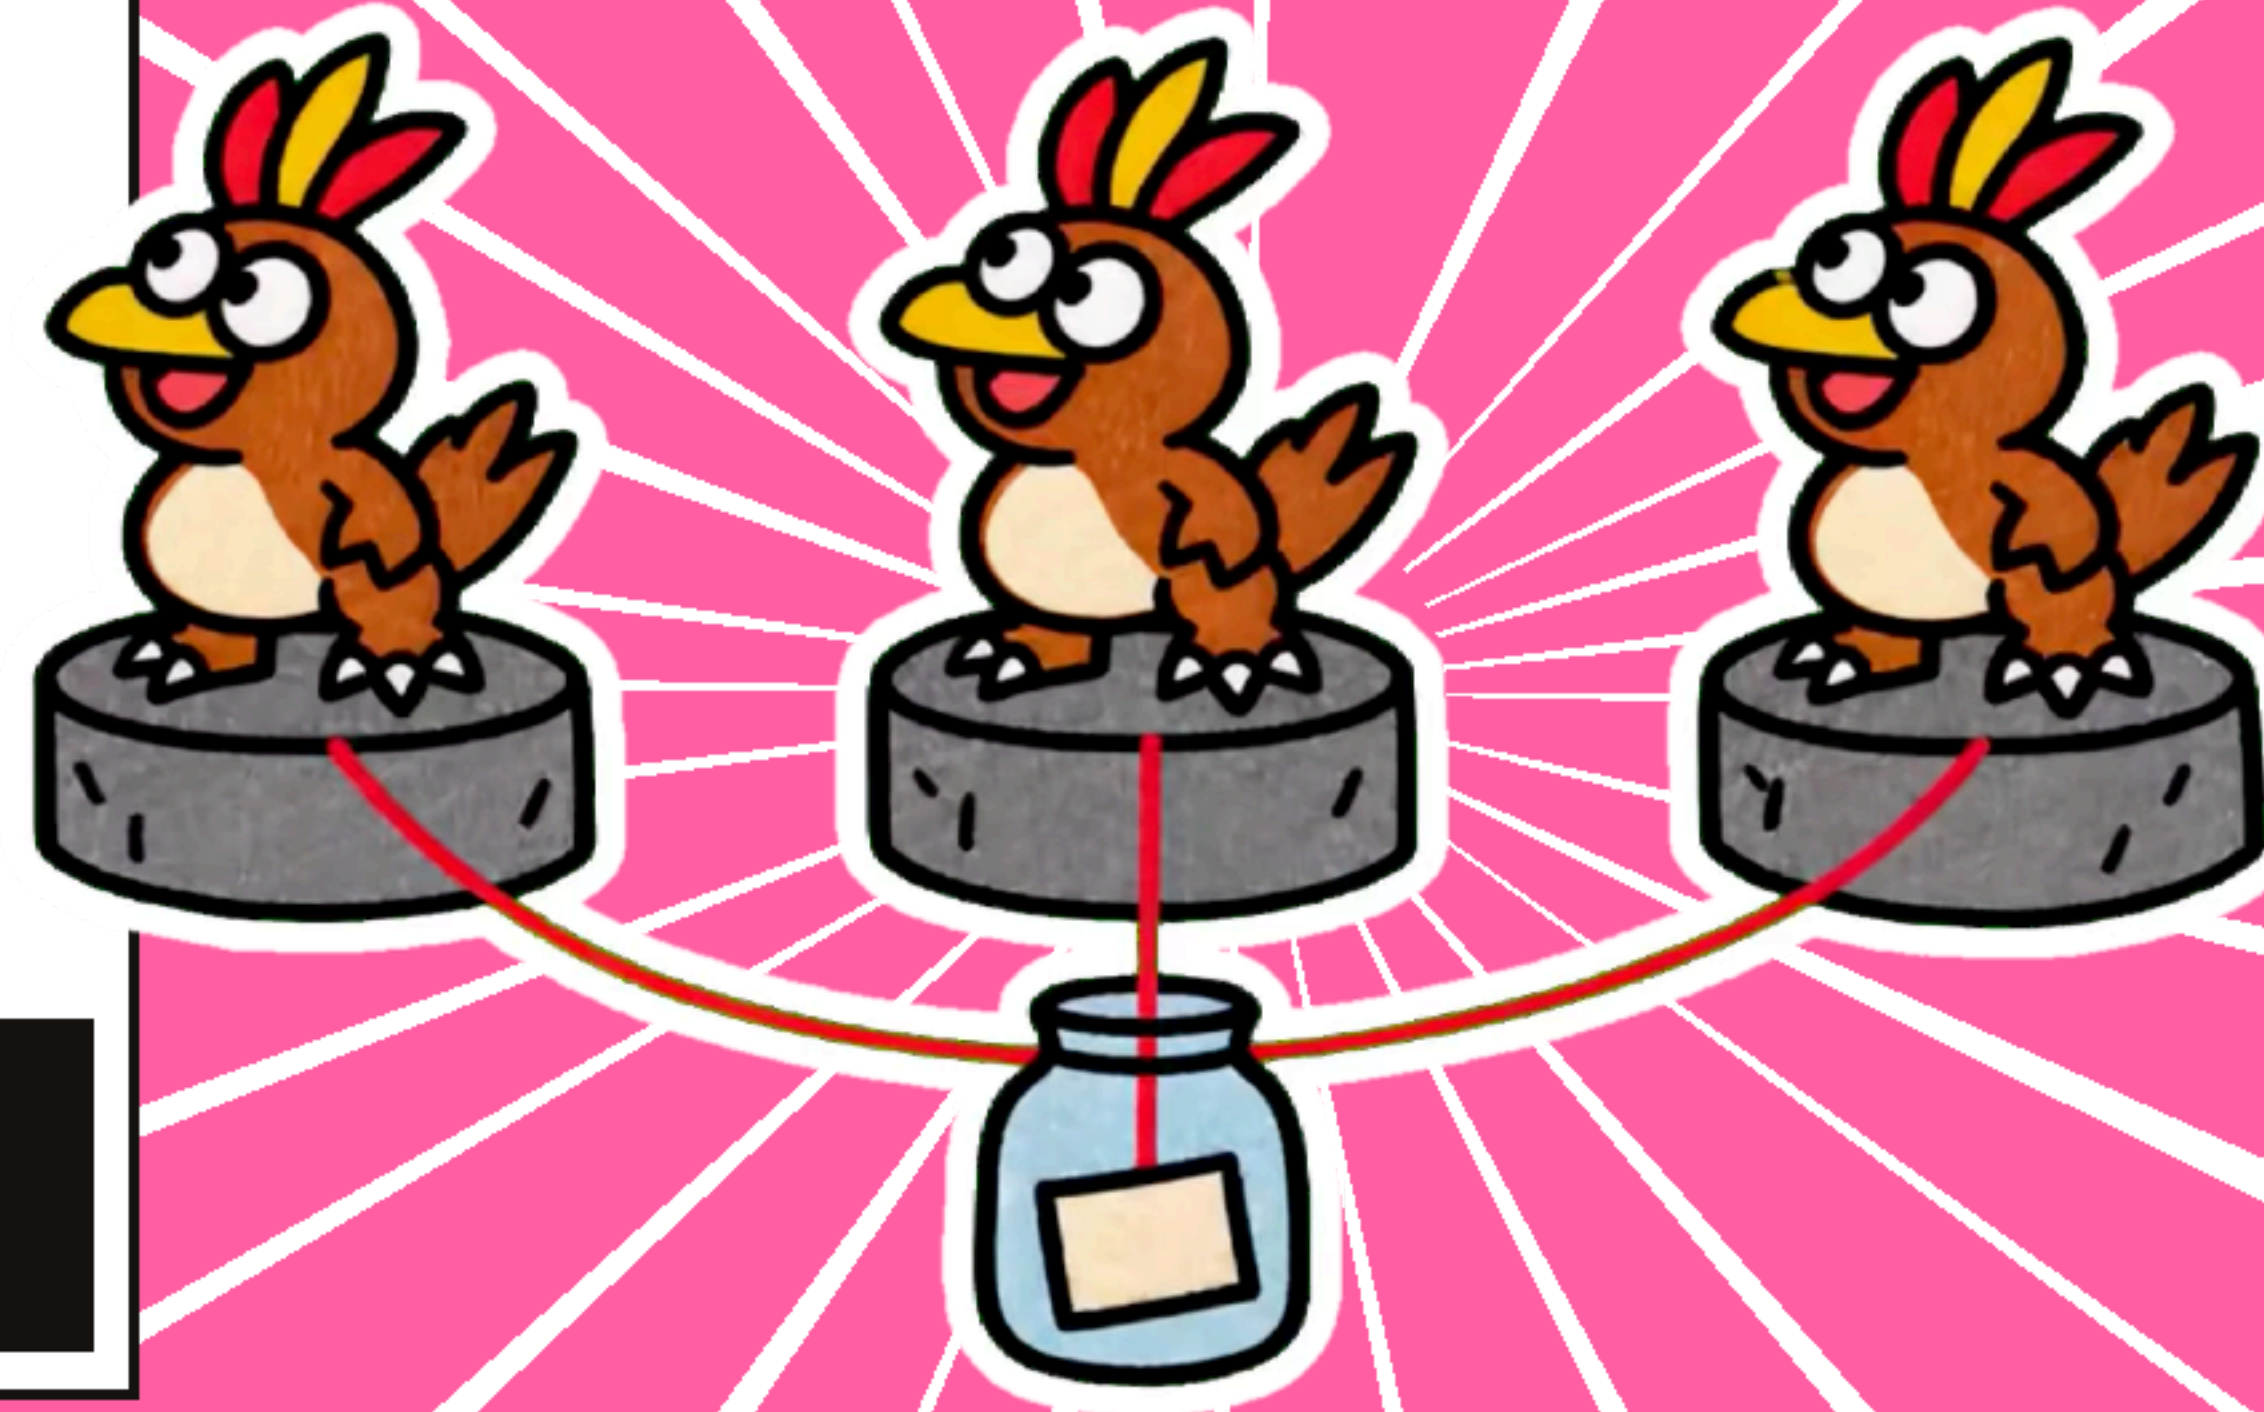

Эволюция. Что напечатает?

A | три разных имени**B** | три Pidgeot**C** | NameError

08_evolution.py

```
names = ("Pidgey", "Pidgeotto", "Pidgeot")  
stages = [lambda: s for s in names]  
print([stage() for stage in stages])  
print(stages[0].__code__.co_freevars)
```

```
['Pidgeot', 'Pidgeot', 'Pidgeot']  
( 's', )
```

Три лямбды держат одну банку
