

03_legb.py

bonus = 2

```
def make_attack(power):  
    def attack(level):  
        return power * level + bonus + len("!")  
    return attack
```

```
tackle = make_attack(40)  
print(tackle(5))
```

Четыре имени. Откуда каждое?

03_legb.py

```
print(tackle.__code__.co_varnames)
print(tackle.__code__.co_freevars)
print(tackle.__closure__[0].cell_contents)
print(tackle.__globals__ is globals())
print(tackle.__builtins__ is builtins.__dict__)
```

Что напечатает каждая строка?
