

```
04_trade/  
# pallet_town.py  
REGION = "Kanto"  
  
def greet():  
    return f"Добро пожаловать в {REGION}!"  
  
# main.py  
from pallet_town import greet  
  
REGION = "Johto"  
print(greet())
```

Чей REGION увидит greet?

A | Kanto

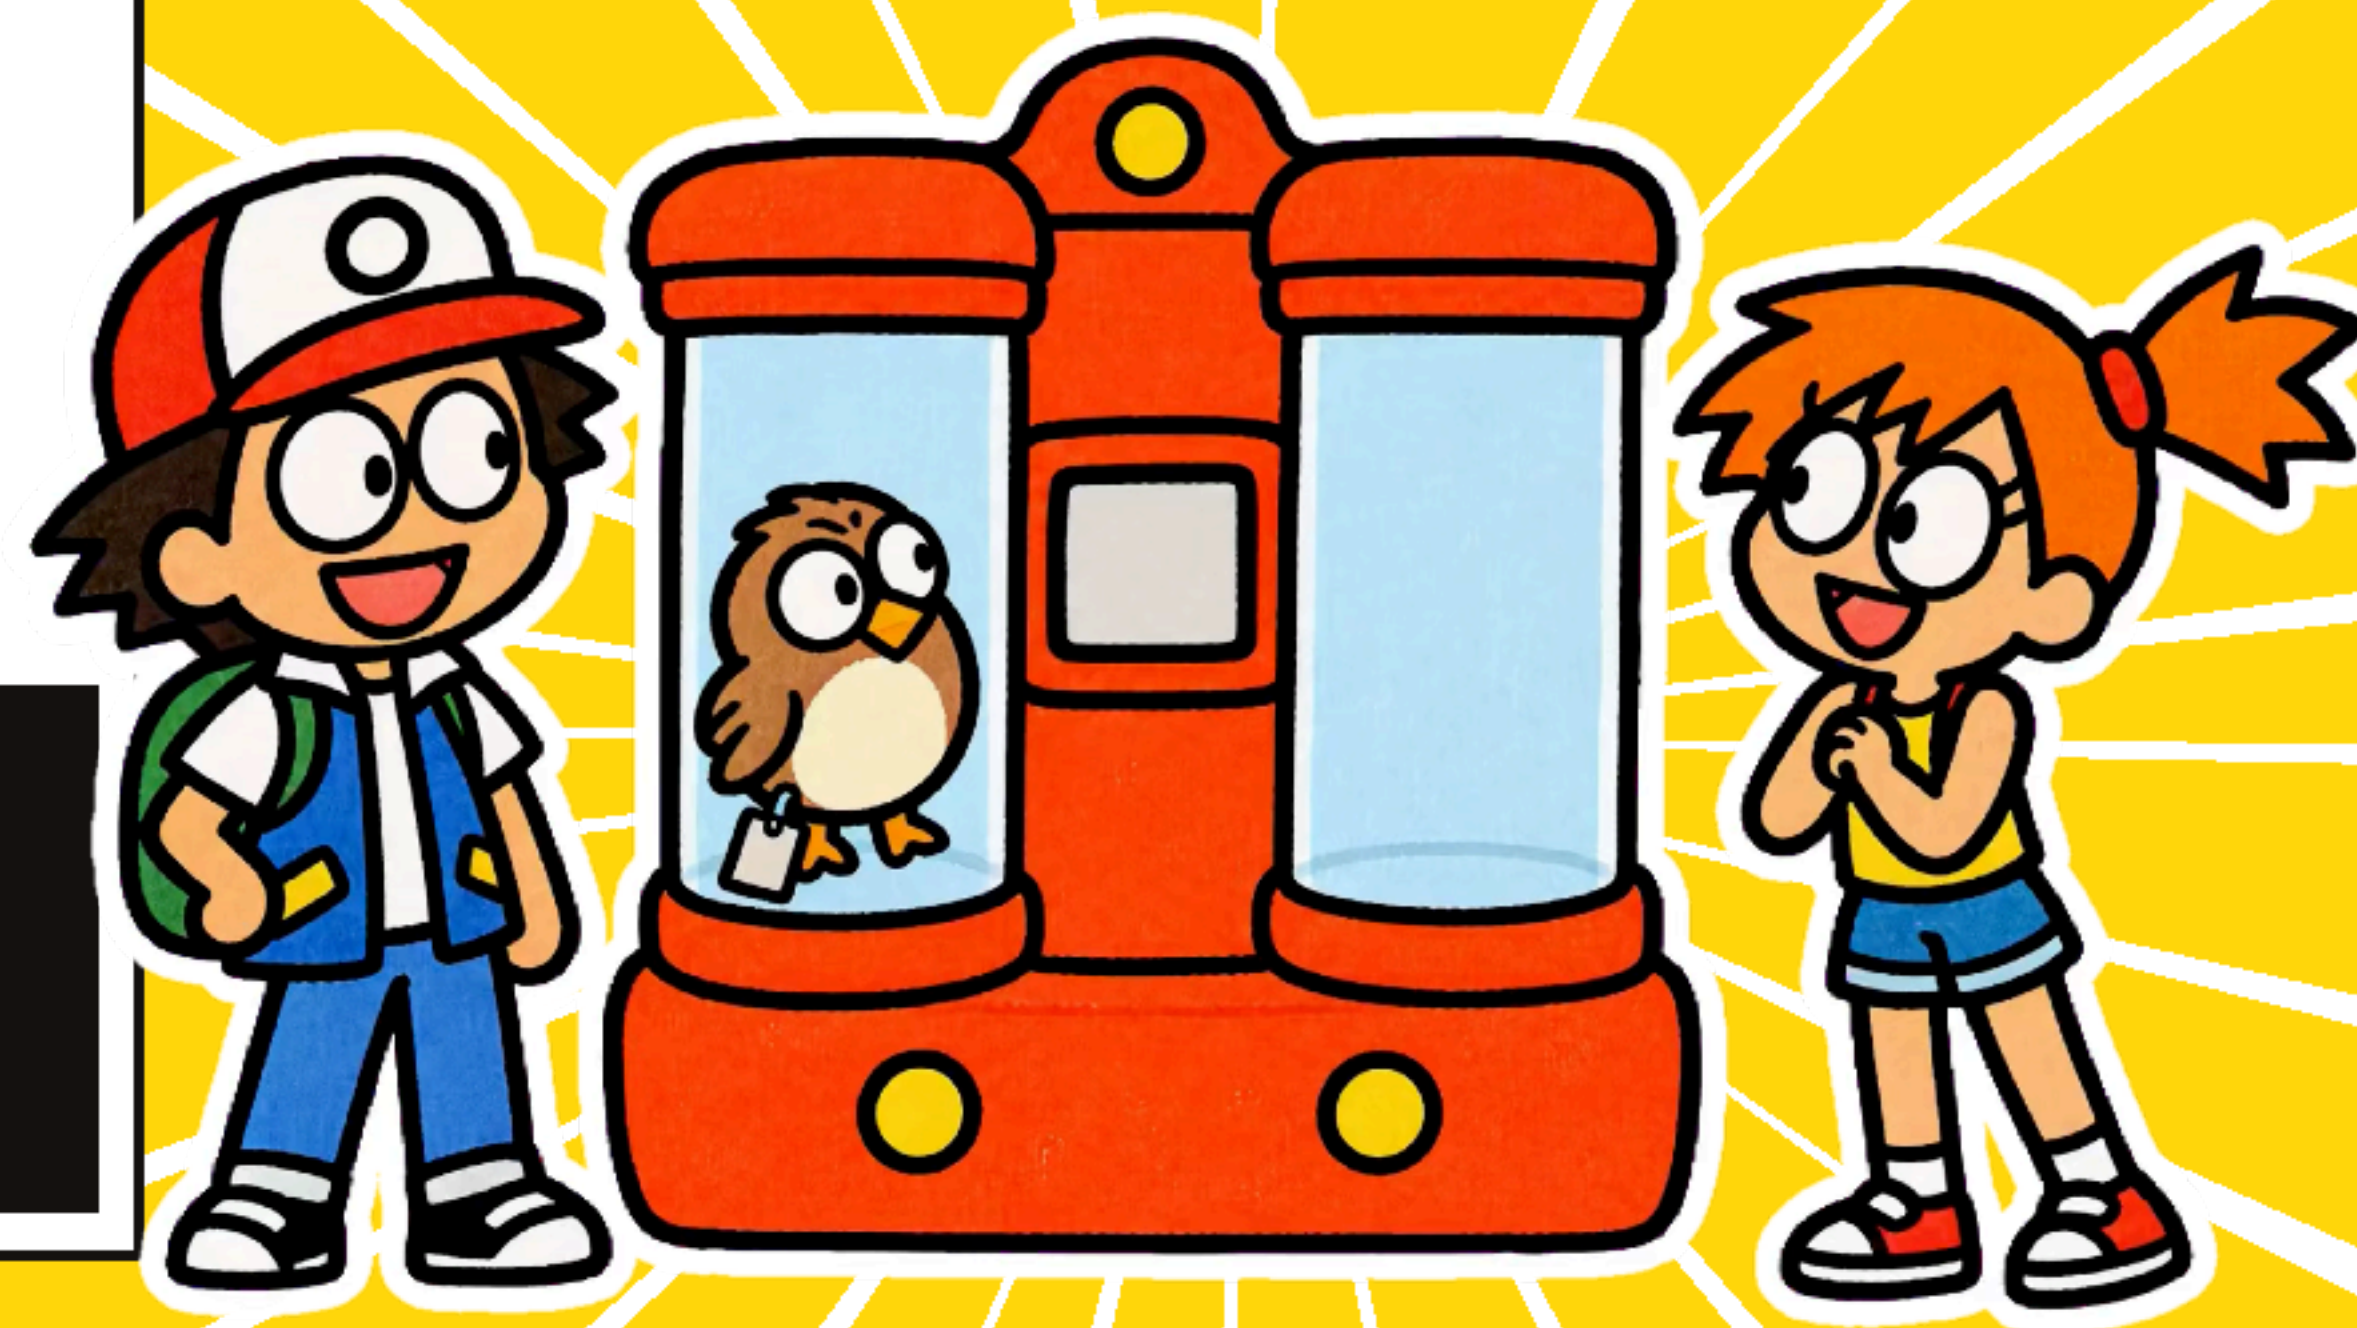

B | Johto

C | NameError

04_trade/main.py

```
print(greet())  
print(greet.__globals__ is pallet_town.__dict__)  
print(greet.__globals__ is globals())  
print(greet.__module__)
```

```
Добро пожаловать в Kanto!  
True  
False  
pallet_town
```

Бирка «родом из» при обмене не меняется

В МОМЕНТ def

🔪 стрелка: greet → pallet_town
