

01_party.py

```
def add_to_party(pokemon, party=[]):  
    party.append(pokemon)  
    return party
```

```
ash = add_to_party("Pikachu")  
misty = add_to_party("Staryu")  
print(misty)
```

Тот же вопрос. Что напечатает?

A | ['Staryu']**B** | ['Pikachu', 'Staryu']**C** | []**D** | TypeError

28_reveal.py

```
def add_to_party(pokemon, party=[]):  
    party.append(pokemon)  
    return party
```

```
print(add_to_party.__defaults__)  
ash = add_to_party("Pikachu")  
misty = add_to_party("Staryu")  
print(misty)  
print(add_to_party.__defaults__)  
print(ash is misty)
```

```
([],)  
['Pikachu', 'Staryu']  
(['Pikachu', 'Staryu'],)  
True
```

B

Список один — он лежит в `__defaults__`

В МОМЕНТ def

✎ обведите `party=[]`docs.python.org/3/tutorial/controlflow.html#default-argument-values
