

15_slash.py

```
def attack(pokemon, /, **effects):  
    return pokemon, effects
```

```
print(attack("Pikachu", pokemon="Meowth"))
```

```
('Pikachu', {'pokemon': 'Meowth'})
```

До / имена не принимаются

ВО ВРЕМЯ ВЫЗОВА

16_unpack.py

```
def attack(pokemon, move, *targets, crit=False, **effects):  
    return pokemon, move, targets, crit, effects
```

```
team = ("Onix", "Geodude")  
status = {"crit": True, "burn": True}  
print(attack("Charmander", "Ember", *team, **status))
```

При вызове — наоборот. Куда уедет burn?

A | в crit**B** | в targets**C** | в effects
